

OBJECTCLASS

1. Which of these class is superclass of every class in Java?

- a) String class
- b) Object class
- ☒ c) Abstract class
- d) ArrayList class

2. Which of these method of Object class can clone an object?

- a) Objectcopy()
- b) copy()
- c) Object clone()
- ☒ d) clone()

3. Which of these method of Object class is used to obtain class of an object at run time? a)

- get()
- b) void getclass()
- ☒ c) Class getclass()
- d) None of the mentioned

4. Which of these keywords can be used to prevent inheritance of a class? a)

- super
- b) constant
- c) class
- ☒ d) final

5. Which of these keywords cannot be used for a class which has been declared final? a)

- abstract
- b) extends
- ☒ c) abstract and extends
- d) none of the mentioned

6. Which of these classes relies upon its subclasses for complete implementation of its methods?

- a) Object class
- ☒ b) abstract class
- c) ArrayList class
- d) None of the mentioned

7. What will be the output of the following Java program?

```
abstract class A
{
    int i;
    abstract void display();
}
class B extends A
{ int j; void
  display()
  {
      System.out.println(j);
  }
}
class Abstract_demo
{
    public static void main(String args[])
    {
        B obj = new B();
        obj.j=2; obj.display();
    }
}
```

- a) 0
- ✓ b) 2
- c) Runtime Error
- d) Compilation Error

8. What will be the output of the following Java program?

```
class A
{ int i; int j;
  A()
  { i = 1;
    j = 2;
  }
}
class Output
{
    public static void main(String args[])
    {
        A obj1 = new A();
        A obj2 = new A();
        System.out.print(obj1.equals(obj2));
    }
}
```

- ```
 }
 }
}
```
- ☒ a) false
  - b) true
  - c) 1
  - d) Compilation Error

**9. What will be the output of the following Java code?**

```
class Output
{
 public static void main(String args[])
 {
 Object obj = new Object();
 System.out.print(obj.getClass());
 }
}
```

- a) Object
- b) class Object
- ☒ c) class java.lang.Object
- d) Compilation Error

**10. What will be the output of the following Java code?**

```
class A
{ int i; int j;
 A()
 { i = 1;
 j = 2;
 }
}

class Output
{
 public static void main(String args[])
 {
 A obj1 = new A();
 System.out.print(obj1.toString());
 }
}
```

- a) true
- b) false
- ☒ c) String associated with obj1
- d) Compilation Error
